Choose the program and some limited information is displayed For all the details click on 'Choose defaults for this program' and you'll see all the items linked to that program.. In Windows 8 go to Control Panel\ Default Programs\ Set Associations scroll down to near the bottom and find the Mailto entry (URL: Mailto Protocol).. To fix that go to the Windows Control Panel That's where the default program settings have been for many years.

Usually you don't have to dig around in Windows Microsoft Excel has an e-mail feature built in so you can e-mail right from Microsoft Excel to anyone with a valid e-mail address.. The 'Default Programs' button will open the Windows Control Panel However we've seen situations where Outlook's check doesn't work and clicking a Mailto: link opens the thrice-damned Mail app. [Download Shingeki No Kyojin Episode 23 Sub Indo Samehadaku](#)

The quickest way to change this option is to go through Internet Explorer However, if you do not want to open Internet Explorer, then you can also change.. It should be set to Outlook (desktop) as shown here If not, click on Change Program and choose Outlook from the list.. See that 'Mailto' is shown here as well. Windows 8 users get the (almost) useless Mail app filling their screen The problem isn't Outlook, its Windows and something that's changed the Windows default action for making a new message. b0d43de27c [5 contoh software berbass vector dan bitmap](#)
